-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

1. Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
2. Regarding claim 1, the phrase "optionally" renders the claim indefinite because it is unclear whether the limitation(s) following the phrase are part of the claimed invention. See MPEP § 2173.05(d)."

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 2,4,6,10 and 12 rejected under 35 U.S.C. 102(b) as being anticipated by Logue. The reference discloses a device method of tracking

breast feeding sessions including sticker 30 attachable to either the left or right side of the bra indicating which breast was used during the last feeding session. (for claims 1,2 the term "optionally" was assumed in the negative).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1,3,5,7-9, 11, and 13-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Logue. With respect to claims 3, 8 and 14, although indicators 30 (stickers) are shown attached to the nursing bra, it would be obvious for one skilled in the art to attach the same to a night gown or other item of clothing to accomplish the same purpose of indicating the feeding side, or if the nursing bra is not worn.
5. Regarding 1, 5, 7, 9, 11, 13 and 15, (with claim 1 having "optionally" assumed in the positive), recording the time and length of the breast feeding session is not mentioned in Logue. However, indicators such as stickers or labels are generally used for conveying written information which may be changed. It would be obvious for one skilled in the art to use indicators (stickers) 30 in

Logue for recording the time and length of the breast feeding session, as a conventional means for conveying useful information regarding breast feeding.
